Neptun code

Válasz:
For the users’ convenience, we provide the option for the current users to retain their EHA code and password for further use. Therefore, students will not have to remember another code and password either for Neptun or for the IT systems of the university (e.g. PTE-PUBLIC, Eduroam, Wi-Fi, etc.)

However, all the current users will be given a Neptun code – a six-digit combination of letters and numbers – that is going to be the users’ own custom identifier in Neptun administration system. Students can find detailed information about the launch of the new Neptun code on neptun.pte.hu.
